Constructive Enterprises, Inc.

PROVIDING THE STRUCTURE FOR

OUTSTANDING PERFORMANCE

BUILDITSTEEL.COM

CONSTRUCTIVE ENTERPRISES INC

BUILDITSTEEL.COM

OUR COMMITMENT

Since 1996, Constructive Enterprises has been building Nebraska. Our team brings a collective xx years in the industry, on all sides of the build process. Simply, we know construction.

Our understanding and passion for the industry led us to challenge the standard construction model to offer our customers a different, streamlined approach. For our clients, that means:

- *Upfront pricing*
- *Simplified, easy-to-understand contracts*
- *Limited change orders*
- *Ultimate transparency*

Whether it's a design-build project, or a conventional commercial construction approach, or just a pre-engineered metal building or steel structural erection, we understand our clients' decision-making journey and expectations for the build process. We are an authorized builder of Behlen, Nucor and Top Line Steel Buildings. And we are committed to delivering trust and efficiency in our construction services through our close partnerships with area architects, engineers and specialty subcontractors.

WHO WE ARE

At Constructive Enterprises we seek to glorify God in our business practice, company culture, and client interaction. Our core values of integrity, honesty, and determination drive our approach to each project we take on. We strive to maximize people and property to fulfil their God-given potential.

OUR SERVICES

Design-Build

is a construction project deliver system, where the design and construction services are contracted by a single entity known as the design-builder. Which can achieve all the goals of our clients maximizing every dollar used in the design build and construction process.

Construction Project Management (CPM)

is the overall planning, coordination, control of a project, start to finish. CPM's goal is to meet our client's requirements and to produce a functionally and financially viable project. Though the use of value engineering and our staff to achieve all the direct goals of our clients.

General Contracting

Responsible for oversight of construction, management of vendors and trades, and communication of information to all involved parties, throughout the course of a building project.

Alternative Financing Solutions

Using our Pre-Design & Buildings Services, our planning staff, will work with you the client to help develop and define the overall scope of your project. Through this process we can maximize time, resources and money, and ultimately help the client determine if the project is even viable. If viable this process can define the scope of work enough to determine a firm cost and schedule for the project.

Pre-Design & Building Services

In today's complex economy financing for some building projects can be a major road block. We understand conventional financing is not always a good fit for all projects. Through our association with other financing institutions and consultants, we have found financing alternatives are available, we truly believe if there is a will there is away.

OUR CLIENTS

QUALITY & VALUE

I am writing to recommend the services of Constructive Enterprises.

I have worked with the group at Constructive Enterprises for my last two building projects. They assisted me with several aspects of the build. Both projects were completed in a timely manner and with great quality. As with any project, there are always changes during the build, Brian and his team were more than accommodating. We got the necessary changes made without adding to the bottom line. I will definitely continue to use Constructive Enterprises for future projects.

Rick Sebek

In 2015-2016, we were in the process of building a new 1,200 seat worship center for our church. Constructive Enterprises was our steel erector company. Our building is a steel building so they had a large part of that phase of our construction. I can say that Constructive Enterprises served us well and in a timely way. The cost of this portion of our construction was as we anticipated and the service was outstanding. This company continues to have our confidence for any future construction needs we may face.
